Graduated Cum Laude.

Classes about object-oriented programming,
databases, operating systems and networks.

High School Diploma with advanced Science

Sainte Marie de Blois (France)

2008 - 2011

Technical skills

JavaScript

I have created several extensions and apps for Google
Chrome based on JavaScript since 2012. I have
learned how to modify the DOM to enhance the
experience of communities I am part of (e.g. Preview
for Designer News).

Java

Nearly all my class projects have been in Java: various
desktop applications, an Android application and a
website to get movie suggestions built with Java EE.

Back-end development

I mainly developed in PHP during my internships. I
also learned Ruby, separately and with Ruby on Rails,
during my spare time.

Non-technical skills

Hobbies

Creating curated playlists for friends on Spotify.
Sharing beautiful websites on Designer News.
Exploring trending projects on GitHub.
Reading and writing on Medium.
